EDUCATION

Indian Institute Of Information Technology, Ranchi

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 8.51

EXPERIENCE

Full Stack Development Intern

Jul 2025 – Jun 2026

DAaranya.ai (Early-Stage Startup)

Remote

- Developed responsive frontend applications with React.js, Next.js, TypeScript, and TailwindCSS, serving 1,000+ monthly active users
- Connected Stripe and Razorpay payment gateways, enabling 10+ paid subscriptions for the IntelliCoach product
- Created reliable Stripe webhook handlers that prevent duplicate charges during network retries, protecting revenue and customer trust
- Implemented JWT authentication to replace session-based login, enabling stateless scaling and secure protected routes
- Launched a multi-tenant serverless backend on Google Cloud Platform using Cloud Run, Cloud SQL, and Firestore, reducing publisher onboarding time

PROJECTS

Lumina | Telegram Academic-Life Assistant [GitHub](#) | [Live](#)

Jul 2026 – Present

- Designed core attendance and scheduling features to run without LLM dependencies, backed by 374 automated tests and eliminating API costs for critical functions
- Automated attendance and timetable extraction from photos using Groq Vision, with user confirmation before any database write
- Built an automated reminder system with duplicate detection, daily limits, and quiet hours after 9 PM to prevent user spam
- Ran the full API and Telegram bot on Render's free tier, maintaining \$0 monthly infrastructure cost

PulseRAG | Real-Time Conversational Intelligence [GitHub](#) | [Live](#)

Jun 2026 – Present

- Produced a retrieval-augmented generation application that converts call recordings into cited answers using FastAPI, LangChain, FAISS, and Groq Whisper
- Reduced embedding memory usage by 60% by converting PyTorch models to ONNX, fitting the stack within Render's 512MB free tier while maintaining retrieval accuracy across 5 benchmarks
- Cached repeated questions with Redis to improve response time and lower LLM API costs
- Restricted answers to transcript content only to improve reliability, and shipped a voice-to-text frontend with 57 automated tests

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C, C++

Frontend: React.js, Next.js, TailwindCSS, HTML, CSS

Backend: FastAPI, Django, Flask, Express.js, Firebase

AI and ML: LangChain, FAISS, Sentence Transformers, ONNX, Groq APIs

Cloud and DevOps: Google Cloud Platform, Serverless Architecture, Render, Linux, Git, Docker

Databases: PostgreSQL, MongoDB, Firestore, Cloud SQL, Redis

Payments and APIs: Stripe API, Razorpay API, REST APIs, Webhooks

Relevant Coursework: Data Structure and Algorithm, Database Management System, Networking, OOPS, Computer Architecture

ACHIEVEMENTS AND LEADERSHIP

- Organizing team member for Quasar 2024 Hackathon and Competitive Programming Contest at IIIT Ranchi
- Lead, IoT and Robotics Club, IIIT Ranchi
