## EDUCATION

### •Indian Institute Of Information Technology, Ranchi

2023-2027

B.Tech (Computer Science and Engineering)

CGPA: 8.50

## WORK EXPERIENCE

### •Full Stack Development Intern

Remote

DAaranya.ai

Jul 2025 – Jun 2026

- **Architected and built** a scalable frontend using **React.js**, **TypeScript**, and **TailwindCSS**, serving **1000+** monthly active users with responsive, production-ready interfaces.
- **Integrated Stripe and Razorpay payments**, implementing subscription paywalls for IntelliCoach and enabling **10+** paid subscriptions through dual-gateway monetization.
- **Engineered idempotent Stripe webhooks**, preventing duplicate charges and ensuring reliable payment state across retries and network failures.
- **Implemented JWT authentication**, enabling stateless session management and secure protected routes.
- **Designed and deployed a multi-tenant architecture** on **Google Cloud Platform** (Cloud Run, Cloud SQL, Firestore), enabling isolated tenant environments and scalable publisher onboarding.

## PERSONAL PROJECTS

### •TransactSafe — Idempotent Transaction Processing Service

Jun 2026

Go, PostgreSQL, REST API

- **Designed and implemented idempotent transaction processing**, preventing duplicate fund transfers on retried or replayed requests using idempotency-key based deduplication.
- **Engineered concurrency-safe balance updates** using Go mutexes and PostgreSQL row-level locking, preventing race conditions during simultaneous transactions on the same account.
- **Implemented atomic batch transfer rollback**, ensuring all-or-nothing consistency across multi-account transfers when a partial failure occurs mid-batch.
- **Wrote concurrent load tests** simulating hundreds of duplicate and conflicting requests, validating zero double-charges and correct balance integrity under race conditions.

### •AI Ascent — Interactive AI/ML Learning Platform

Dec 2025 - Jan 2026

React 19, TypeScript, Vite, TailwindCSS, FastAPI, Pyodide, TensorFlow.js

- **Engineered a browser-based Python IDE** using **Pyodide**, **Web Workers**, and **Monaco Editor**, enabling real-time code execution and visualization.
- **Developed a real-time AI Vision Lab** using **TensorFlow.js**, enabling live webcam image classification.
- **Architected a modular lab system** using **Factory and Builder patterns**, supporting 10+ interactive environments.
- **Built an admin CMS and lesson rendering system** using **TypeScript discriminated unions**, enabling scalable content delivery and progress tracking.

## TECHNICAL SKILLS AND INTERESTS

**Languages:** JavaScript, TypeScript, Python, SQL, Bash, C, C++

**Frontend:** React.js, TailwindCSS, HTML, CSS, MathJax, SMILES Rendering, Responsive Design, UI/UX Design

**Backend:** FastAPI, Django, Flask, Express.js, Firebase

**Payments & APIs:** Stripe API, Razorpay API, RESTful APIs, Webhooks

**Cloud and DevOps:** Google Cloud Platform (Cloud Run, Pub/Sub, Cloud Scheduler, Cloud SQL), Firebase Hosting, Firestore, Linux, Git

**Databases:** PostgreSQL, Neon DB, Cloud SQL, Firestore

## ACHIEVEMENTS & LEADERSHIP

- Organizing team member for **Quasar 2024 Hackathon** and Competitive Programming Contest at IIIT Ranchi

2025

- Lead, **IoT and Robotics Club**, IIIT Ranchi

2025 - Present
